

News

Basel, December 2019

Dear Partners,

for those who could not attend the international exhibition Aquanale in Cologne in November 2019 which was a great succes, we would like to share some „news“ so that you are up to date and prepared for 2020.

+++ Change of brand from Nordmann Engineering to Condair in 2020 +++

Since many years the Nordmann Engineering belongs to the Condair Group AG, Switzerland. According to that we ever since benefited from the synergies in R&D, supply chain and our assembly factory in Hamburg, Germany. As the Condair Group pursues a one-brand strategy the group management decided to change the brand from Nordmann Engineering to Condair in 2020.

This strategic decision will not have an impact on our business – all people, processes and products will not change – it is just the brand on our units that look a bit different.

To get a bit more familiar with that, please find some additional informations....

Nordmann Omega Pro

We just change the brand from **Nordmann** to **Condair**

Condair Omega Pro

Nordmann Omega

We just change the brand from **Nordmann** to **Condair**

Condair Omega

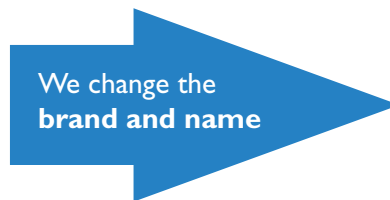

Condair Spa Control Delta

We already launched our external wellness control under the brand Condair in 2019 – **no change.**

Nordmann ES4

Condair Sigma

We change the brand from Nordmann to Condair and the name from **ES4 to Sigma**. The name is like a telling name as Sigma stands for conductivity which describes the technology inside – electro type where conductivity is needed. By the way, Omega stands for resistive – this is why we have two models where the name is Omega as they have resistive technology inside.

Nordmann AT4D

We are working on a relaunch of the whole unit. Thus, we will come out 2021/22 with the new unit named **Condair Sigma Pro** as the AT4D uses the same technology as the ES4. That means this product will be still branded under Nordmann, which is maybe not ideal but it does not make sense to rebrand a product and after a short period to come out again with the new model.

+++ New products, new features +++

The Omega will come out in 2020 with even more features and options.

For each Omega there will be an option to install them on the ground in order to place them e.g. directly under the bench as enough space for the humidifier is always an issue. That does not mean that each Omega can be installed wall and floor mounted. When ordering the Omega you have to choose the option you want, please check the new pricelist and if you are struggling we will help you.

In addition we will launch a 1,5kW 2kg/h and 4,5kW 6kg/h Omega where less power consumption is needed which is interesting for residential applications.

+++ Pricelist and brochures +++

The change of the brand from Nordmann Engineering to Condair is foreseen on the **1st of March 2020**. Therefore the pricelist 2019 is valid until end of February 2020. Before that we will send out the new pricelist 2020 with all the new products and features.

According to that timeline we will update our manuals and brochures which will be available to download from our website www.nordmann-engineering.com

+++ Opening hours at year end +++

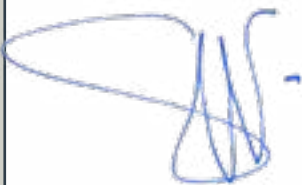

The last working day of our logistics is the 20th December 2019, the first working day is the 6th January 2020.

The office is closed on 24th, 25th and 26th December 2019, we have an emergency service on 23 th, 27th, 30th 31th December 2019 and on the 2nd and 3rd January 2020.

First orders (depending on the delivery time of the materials) can be shipped on 06th January 2020.

Last but not least we would like to thank you for your contribution and successful collaboration in 2019 and we looking forward to achieve our goals in 2020.

Kind regards

Spencer White
